

BIOCÉ PEPTIDE

Our patented compound is derived from the cell walls of *Nicotiana sylvestris*, a white flower native to southern climates. It's the first of its kind to combine three functions essential to healthy skin: reducing free radicals, activating skin's cellular DNA repair, and boosting collagen renewal.

ARBUTIN

Arbutin is a naturally occurring glucoside or molecule, found in the bearberry plant. It is a clinically tested, safe active used in skin whitening and depigmenting formulations. Arbutin reduces the production of melanin by inhibiting the enzyme tyrosinase and halting UVB absorption, thus preventing the appearance of pigmentation spots.

CAFFEINE

Harvested from abundant, sustainable plants, caffeine is known for its ability to help detoxify skin tissues. We also use it to shrink fat deposits and reduce puffiness.

CI AGE DV

An age-control complex that helps prevent aging based on its anti-glycation and collagen-protecting properties. This complex helps increase skin hydration, firmness, elasticity and smoothness.

COLLAGEN ACTIVATOR

Collagen is basically the protein that holds skin tissue together. Collagen Type I is the most abundant type, but it also decreases with age. This active complex boosts Collagen Type I production in skin, restoring its firmness and elasticity.

EYE CONTOUR SOLUTION

This patented blend adapts three potent ingredients to care for the delicate eye area: a botanical extract with strong antioxidant properties, an organic polymer that reinforces skin's structure and elasticity, and VITAMIN B3, to help collagen regenerate and strengthen the skin barrier.

FORTIFYING AND RESTRUCTURING AGENT

A powerful active ingredient that helps fight cell dehydration and has antioxidant properties. Also, helps visibly decrease the appearance of sagging and wrinkly skin, improving firmness and elasticity.

GLAUCINE

A natural compound found in various plant species that helps improve contours and skin firmness and helps visibly decrease the appearance of cellulite.

HEMATITE EXTRACT

This iron-rich, crystalline mineral helps restore skin's structure from within by boosting pro-collagen synthesis; pro-collagen is one of the building blocks of collagen. The result on skin is better tone, strength and radiance.

HYALURONIC ACID

Able to hold up to 1,000 times its weight in water, this acid naturally occurs in skin, keeping it plump and smooth. Because aging depletes the amount our skin makes, our formulas restore the element, so skin stays hydrated and vibrant.

KIGELIA EXTRACT

A tropical African flowering tree, *Kigelia africana* is known for the antibacterial properties of its fruit, and used in traditional remedies. We use it to help tone and strengthen facial contours, improving skin firmness and elasticity.

LACTIC ACID

As one of the alpha-hydroxy acids (AHAs), lactic acid is naturally derived from fruit sugars or milk. In our formulas, it helps exfoliate and stimulates cell growth in skin. It's also moisture-retaining to keep skin soft and smooth.

LARCH EXTRACT

Extracted from the unused portion of already harvested trees, macromolecules in larch offer excellent moisture control. When absorbed, the extract helps skin molecules hold onto water, reducing moisture loss from skin.

L-ARGININE

An essential amino acid, L-Arginine is known as a Natural Moisturizing Factor (NMF), because it helps the skin do what it does naturally: attract and hold water. Ours is sourced from plants, and works as a conditioner to maintain skin hydration.

SOLANUM LYCOPERSICUM LEAF CELL CULTURE

Obtained from tomato cell cultures, this plant-based ingredient helps protect the skin from pollution, free radicals and premature aging.

MARSH SAMPHIRE EXTRACT

This extract comes from *Salicornia*, a hardy coastal plant with an extraordinary ability to protect itself from its dry, salt-air climate. It's been clinically shown to help skin adapt by carrying and holding water and fortifying skin's moisture barrier, for smooth, supple skin.

MULTI-MINERAL CHRONO-ENERGISER

Our blend combines three essential minerals—ZINC, MAGNESIUM and COPPER—to excite the energy in skin cells and boost metabolism. By increasing cell vitality, it protects and revitalizes skin tone.

NATURAL ANTIOXIDANT COMPLEX

This all-plant complex, including VITAMIN E, SOYBEAN OIL and SUNFLOWER SEED OIL is a natural defense against free radicals. Plus, it helps preserve the integrity of our formulas against oxidation.

SEA FENNEL EXTRACT

This extract is drawn from *Crithmum maritimum*, an aromatic medicinal plant native to coastal Great Britain. It's used in our formulas to help regenerate skin cells, add moisture, and eliminate bacteria.

SQUALANE

Squalane is a natural emollient with a great affinity for skin—since it's also found in sebum, skin's built-in moisturizer. We derive ours from olive oil to help restore suppleness and flexibility to skin.

SWISS SPA WATER

Switzerland is well known for its scientific excellence—and is home to one of the world's most advanced labs, where our BioCé Peptide was born. It's also the source of our SWISS SPA WATER, rich in CALCIUM and MAGNESIUM, which has been known as a curative water source since the Roman era.

WHEAT MICROPROTEINS

Wheat peptides provide pleasant and soothing care. They help protect skin cells against UVB radiation and help reduce skin irritation.
